Certain products may feature a blend of various materials, and in such instances, we will identify and highlight the predominant material in the product.

(*) To ensure optimal maintenance, it is essential to shield these items from rain, direct sunlight, and abrupt temperature changes. Natural materials such as bamboo, rattan, beechwood, or seaweed may undergo color changes or develop cracks over time. When exposed to natural elements, it is advisable to regularly apply a suitable oil or varnish for each specific material. This not only extends protection against rain and UVA rays but also enhances the product's longevity. For cleaning, use a cloth or a brush to eliminate dust, and gently rub with a slightly moistened sponge.
